Fun Fact: CODEX

A codex is an ancient manuscript text in book form, typically made from a number of sheets of paper, vellum, papyrus, or similar material, with hand-written content on both sides, often bound by stacking the pages and fixing one edge. It replaced the scroll format and is considered the earliest form of the modern book.

Code Repositories

All repositories are under the control of GIT.

Access to repositories is granted by explicit permission.

The following are repositories that are under active maintenance:

- TI58/59 Module Library
- Control Data Modules and DTCyber Enhancements
- System 360/370 Repositories
- Legacy Code Projects (VB6, VBA, etc.)
